PRODUCT NEWS

Tailor your home insurance with the best oil damage protection on the market!

We are pleased to announce our improved protection for oil damage coverage. Read on and you'll see that it's simply the best!

Today, the vast majority of insurance companies do not cover the decontamination of your property following a spill caused by a defective oil tank. This type of loss and soil rehabilitation can reach thousands of dollars!

To ensure that you are **fully** protected as a property owner, we developed a new oil damage endorsement. It includes the cost of cleaning and decontaminating your building, contents and soil, while liability coverage protects against legal action for contamination of your neighbour's property. In addition, TD Insurance Meloche Monnex's coverage really stands out by offering a more generous financial protection with liability covered up to the policy limit.

This new coverage option will be **available on July 28**.

Look for valuable safety tips on installation and maintenance of oil tanks on our Web site.

It's worth a call!
