

HOME INSURANCE PRODUCT NEWS

Tailor your home insurance with the right water damage protection

Extreme weather events have caused a dramatic increase in water damage to Canadian homes over the last few years. With this trend expected to continue, we want to help you manage your water damage coverage and offer some flexibility. Soon, you will be able to purchase the type of protection and insurance limits that correspond to your needs.

Our offer is simple: higher limits and a more generous protection.

Take advantage of these protection options: damage caused by **ground or underground water** such as sewer back up; damage caused by **water above ground** such as heavy snow and water entering through windows, or you can also select both!

When and how

These new coverage options will be available **July 28**.

Please go to our Web site for safety tips on home maintenance to prevent water damage!

It's worth a call!
