

Adrian Davis, P. Geo.  
Geoscience Councillor

With great interest I would like to put my name forward for the position of *Geoscience Councillor*.

**A native to New Brunswick**, I moved back from Alberta in late 2016, since then, I have been involved in consulting, prospecting, and volunteering within New Brunswick.

My goal at APEGNB council is to step up by being involved with community engagement, policy engagement, volunteering, and to contribute with the engineering and geoscience communities, and to future geoscientist in the province of New Brunswick.

My community service is especially important to me. I am on the board for The Fredericton Community Kitchens (Fredericton), just recently a Stakeholder Member with Harvey Improvement Association (Harvey), volunteering at Harvey Regional Heritage & Historical Association (Harvey) and volunteering at Quartermain Earth Science Centre (UNB, Fredericton).

My academic background consists of a diploma in Geotechnical Engineering Technology (2003, Lindsay, Ontario), a bachelor's degree in Geology (2006, Wolfville, NS). Accordingly, I have attended conferences and short courses on geology, geophysics, environmental and geotechnical topics.

My professional work experience within the geology field began in 1999. These experiences were gained at diamond, gold, metallurgical/thermal coal, rare earth elements, and base metal exploration sites throughout Canada. These included working in Northern Quebec, Nunavut, the structurally and otherwise geologically complex Cardinal River coal deposits, the Thompson nickel deposits, stratigraphy challenges at a coal deposit near Wabamun Lake (Alberta), and have been engaging with general public, landowners, contractors, prospectors and the government within New Brunswick.

Sincerely,

Adrian R. Davis, P. Geo.
