

Shawn Amberman, P.Eng, SAFe, AMLI, ACS, ALMI
Candidate statement for At Large Council member of APEGNB

The engineering profession is close to my heart. I have been privileged to work as an engineer for 15 years; social responsibility is something that I take seriously. The engineering profession is not only a technical field, but one that impacts our communities. Over a period of nearly ten years, I have had rewarding volunteer experiences with the Association of Professional Engineers and Geoscientists of New Brunswick as well as several other non-profit organizations. This is why I have chosen to offer to serve as the At Large Councillor on APEGNB Council.

I am seeking the opportunity to give back to the profession, to the community, and to the next generation of professionals in order to help create a promising future in New Brunswick.

Starting my career in 2006 as Production Supervisor at Surette Battery Company Ltd, I became Production Manager within three years. In 2011 I took a new position as business process analyst at Assumption Life Mutual. I gained experience in process improvement, quality assurance, change management, health and safety, imaging systems and material handling automation.

In addition to my bachelor's degree in industrial engineering (2006) at the Université de Moncton, I have additional training in Lean, SAFe Agile project management certification, along with several certifications in the field of insurance services (ACS, AMLI, FSRI) and change management.

My career path is built on experience in the manufacturing field as well as in the service industry. These experiences are complemented by nine enjoyable years volunteering with the APEGNB Moncton Branch where I served as President, Vice-President, Flagship Event Chair (founder of the Moncton Soapbox Derby), Secretary and Social Committee. Additionally, I have been involved in a number of events to promote the engineering field.

My professional background in stakeholder outreach, governance and value-added activities, along with my ongoing contributions to APEGNB, make me a good candidate for this position.

Thank you for taking the time to consider my candidacy.

Sincerely,
Shawn Amberman P.Eng/ing, ACS, AMLI, FSRI, SAFe
